Introduction

The financial information contained in this report comes from the municipal officials who filled out the local government finance survey distributed jointly by the U.S. Census and MMA. The goal of the collaborative effort is to consolidate the several financial surveys conducted by the two organizations into one request to the communities. As a result, 211 communities participant in this year's survey for a response rate of 43% .

For the purposes of this report, the data are presented in two ways.

1. Population Group Averages and Statewide Estimates. Based on the information provided by the 211 participating municipalities, statewide revenue and expenditure estimates are calculated using a three-step formula. First, average revenue and expenditure data are calculated for each of the six population groups. Second, average revenue and expenditure data are multiplied by the number of municipalities in each population group, yielding estimated group-wide revenue and expenditure totals. Third, all of the population group totals are summed to achieve an estimated statewide total. Please note, in cases where municipalities reported that they did not have a particular revenue stream or expenditure, a zero was used in the averaging calculation.

2. Municipal Data. The information collected in the survey is also presented on a municipality-by-municipality basis and sorted by population categories. This format provides a quick and easy way for municipal officials to see how their revenue and expenditure data compare with other communities.

On behalf of the U.S. Census Bureau and MMA, thank you for taking the time to complete this survey. We hope you find this information useful. If you have any suggestions on how to make the report better, please feel free to contact MMA's Kate Dufour at 1-800-452-8786 or kdufour@memun.org.

Estimated Statewide Revenues and Expenditures

As shown in the charts below, it is estimated that in 2009 municipalities statewide collected \$3.8 billion in revenues and spent \$3.3 billion to provide local services. (Please note, that the total state and municipal shares of K-12 education funding are reflected in both the revenue and expenditure categories.)

Municipal Revenue - Statewide Estimates

Of the \$2.5 billion in municipally generated revenue, property taxes accounted for the largest source. In 2009, municipalities statewide collected \$1.9 billion in property taxes which generated 77% of total local source revenue. The second largest source of municipal revenues were fees for services (e.g. , use of municipal buildings, assessments for sewer and water utilities, solid waste removal and recreational services, etc.), which generated \$223.6 million.

State Revenue - Statewide Estimates

In 2009, municipalities received \$1.1 billion in state aid for a variety of difference purposes, down from the \$1.2 billion distributed in 2008. The largest source of state aid was for K-12 education, at \$887.5 million, which does not include state-level investments in teacher retirement. Municipalities also received an estimated \$116 million in revenue sharing, an \$8 million decrease from 2008's estimated \$124 million. State aid for the Homestead Exemption and local road assistance programs was consistent between 2008 and 2009, generating \$27.2 and \$23 million respectively.

General Administration Expenditures- Statewide Estimates

In 2009, municipalities spent \$238.2 million for the administration of municipal government. This category includes expenditures for all employee benefits and insurances, as well as the cost of operating boards (e.g., selectmen, councilors, planning, zoning, etc.) and administrative offices (e.g., manager, assessor, clerk, tax collector, treasurer, finance, planning, etc.).

The \$131.1 million spent on employee benefits, which includes retirement, health/dental, unemployment and workers compensation benefits for all employees, accounted for the largest expenditure. The \$90.2 million spent on administrative offices accounted for the second largest general administration expenditure.

Public Works Road Expenditures- Statewide Estimates

In 2009, municipalities spent \$239.2 million to maintain and repair roads and bridges. Of the total expenditures, nearly 80% of the cost were for the provision of services, while 20% was spent on capital investments.

Funding for local roads and bridges has been the subject of debate for several years, as questions have been raised regarding the "appropriate" use of road-related tax revenue. Based on the information provided in this survey, in 2009 municipalities collected a total of \$220 million in local motor vehicle excise tax (\$197 million) and local road assistance (\$23 million) revenues and spent nearly \$239 million to maintain local roads and bridges. While some communities may collect more motor vehicle excise tax and state aid revenue than their local road expenditures may require, as a whole, municipal spending on roads is greater than excise tax revenue and state aid receipts.
