Introduction

The financial information contained in this report comes from the municipal officials who volunteered to complete the local government finance survey distributed jointly by the U.S. Census and the Maine Municipal Association (MMA) in December, 2013.

The purpose of surveying for the fiscal information is to track the general fund revenues municipalities collect from all sources and to identify all municipal expenditures according to various services or program categories. When those data are assembled, the goal of the report is two-fold. First, to provide municipal officials with the ability to compare and contrast their revenues and expenditure information with other communities throughout the state that are similar in size and tax bases. The second goal is to allow municipal officials, state policy makers and other interested parties to evaluate the short and long-term trends in municipal revenue collection and expenditure practices on a statewide, all-communities basis and according to municipalities within various designated population categories.

It is clear that the fiscal restraints on Maine's towns and cities are having an impact on their capacity to participate in the extensive fiscal survey process. Between 2008 and 2012, over 200 municipalities annually submitted the requested data for an average response rate of 44%. In 2014, only 134 communities were able to participate, generating a response rate of 27%.

MMA staff are extremely appreciative of the communities able to participate in the request for 2013 fiscal data. We also recognize and sympathize with the fiscal challenges facing those unable to participate. Providing a wide array of local government services directly to their citizens is the obvious priority. Filling out yet another survey deservedly takes second place.

As a consequence of the reduced participation rate, we are unable to aggregate the data and calculate population-based and statewide revenue and expenditure projections or make comparisons with the aggregated data generated in previous years. Instead, the collected data are presented in a spreadsheet format and sorted alphabetically by participating community. The data are easily resortable according to population, for example, or geographic region. We hope these formats provide municipal officials with an easy way to see how their revenue and expenditure data compare with other municipalities.

We now need to review and evaluate the benefits associated with continuing this survey process. At a staff level, it is apparent that as the Legislature continues to withdraw financial support to local governments, municipal officials are finding it harder to justify employing staff to fulfill assignments that provide no obvious or direct benefits to their citizens. If you have thoughts on how the Association should move forward with respect to this surveying project, please feel free to contact MMA's Kate Dufour at 1-800-452-8786 or kdufour@memun.org.
