

To: MMA's Legislative Policy Committee
Fr: Kate Dufour, Director of Advocacy & Communications
Re: September 26 LPC Meeting Updates
Date: October 7, 2024

On behalf of the advocacy team, thank you for your ongoing work on the development of MMA's 2025-2026 legislative platform. Due to the quality of your conversations during the September 26 meeting, the working groups have the feedback necessary to continue developing proposals for the LPC's consideration.

For your information, attached you will find three updated documents: (1) working group [membership list](#); (2) [summary of potential issues](#) for inclusion on MMA's finalized platform, including expanding the responsibility of the Public Safety Working Group to include county jail and general operations funding, and adding the municipal regulation of syringe needle exchange programs located on municipal property to the list of standalone bills; and (3) combined [working group memos](#) summarizing the policy committee's September 26 discussions.

If you have questions about these documents, please do not hesitate to contact me at kdufour@memun.org or 1-800-452-8786.

Again, thank you for your ongoing participation in these discussions and willingness to serve on the LPC.
